

Petite Riviere Elementary School

Configuration	Location	Administration	
		Principal	Vice-Principal
P-6	123 Wentzell Rd, Petite Riviere, NS	L. Jones	NA

Building Use

a. Year Built	<u>1961</u>
b. Building Area	<u>10,800 SF</u>
c. Additions	<u>NA</u>
d. Percentage of Bussed Students	<u>100%</u>
e. Design Classrooms	<u>7</u>
f. Average Number of Students per Classroom	<u>12.6</u>
g. Capacity (e x 25)	<u>175</u>
h. Current Enrolment	<u>88</u>
i. Projected Enrolment (5 Years)	<u>79</u>
j. Current Capacity Utilization (h/g x 100%)	<u>50%</u>
k. Projected Capacity Utilization (i/g x 100%)	<u>45%</u>

	Classrooms	Homeroom Classrooms	Cafeteria	Gymnasium	Lab	Library	Resource/Comp	Music/Kitchen	Multi-Purpose	Other/Unused
Design	7		0	0	0			1	1	
Used		4				1	1	1	1	1

Community Use

Community use as per Facility Use Policy. Brownies, Guides, Beavers and Cubs. Recreational soccer in summer. Greenhouse and garden project.

Capital Construction Plans

There are currently no approved capital construction projects for this school. If the school remains open capital upgrades will be required. The septic system in particular will need upgrades.

Property Services Building Condition Index

Accessibility	7/10
Cladding	7/10
Doors & Windows	10/10
Grounds	8/10
Electrical	7 /10
Fire Alarm & P/A	8/10
Heating	7/10
Interior	7/10
Plumbing	7/10
Roofing	7/10
Ventilation	5/10
Total %	73%

Transportation

Currently 3 buses serve the school with an enrolment of 88. A move to Hebbville can be accomplished with the current number of buses transporting P – 12 together and would increase the efficiency of our transportation system. Where applicable, student age groups transported together, and thus decreasing the number of bus routes, would require bus stop combinations in order to adhere to the 3 stops per 1.6KM URB regulation. Student travel time would be approximately 50 - 55 minutes. Any further information would require a route review to determine the impact on the student transportation system.

Program: The ability as a facility to deliver the public school program

As a facility, Petite Riviere Elementary School has been able to facilitate the delivery of the public school program. The gymnasium is not full-sized and no cafeteria is available. The school has been able to minimize the impact on the students and delivery of programs.

In the first School Utilization Study Part 1 report, a list of factors was introduced which indicate when a school may have reached the point of being too small in terms of its ability to deliver the educational program. These barriers to effective program delivery included having to increase staff allocations, difficulty in retaining suitably qualified teachers to provide specialist services to students and the number of very different professional responsibilities that must be carried by individual teachers.

As the enrolment of Petite Riviere Elementary School continues to decline, the inflexibility and risk caused by these and other factors could increase.

Costs

Annual total operating costs per square foot – average previous two years

2009/2010	2010/2011	Average	Square Feet	\$ Per Sq. Ft.
\$223,378	\$65,692	\$144,535	10,800	\$13.38

Annual utility costs per square foot for 2010-2011

Electricity	Fuel	Water	Sewer	Total	Square Feet	\$ Per Sq. Ft.
\$4,806	\$8,641	NA	NA	\$13,447	10,800	\$1.24

Summary

1. The School Utilization Study from February 2008 recommended that a facility assessment be carried out on Hebbville Elementary, Pentz Elementary and Petite Riviere Elementary. This study was completed in March 2009 and concluded that Petite Riviere Elementary could continue to function for 5 more years with \$221,000 in capital upgrades and for 20 more years with capital upgrades of \$1,086,000.

2. The School Utilization Study also concluded that it may be timely to review the school in 2 or 3 more years.
3. There are some accessibility issues with the school including the stage and washrooms.
4. There would be staff savings in Teachers, Administrative Assistants, Administration, Library staff and Custodial staff if the school were closed. There would also be operational cost savings.
5. The options for Petite Riviere Elementary include:
 - a. Continue to operate the school and upgrade the building
 - b. Move the students to Hebbville Academy
 - c. Consolidate Pentz Elementary and Petite Riviere Elementary in one building
 - d. Construct a new school to accommodate Pentz Elementary, Petite Riviere Elementary, possibly Hebbville Elementary, and possibly Newcombville Elementary.

Methodology

1. Building use, property services building condition index, and community use information was gathered through school visits and interviews with school administrators by the Director of Operations.
2. Transportation comments are based on a preliminary analysis by board transportation staff.
3. Community population trends data was sourced from Statistics Canada.
4. Program comments were prepared by Programs staff based on the ability of the facility to deliver the public school program.
5. Facility operating costs and utility costs were collected from board financial records and utility cost sheets.
6. Enrolment Projection Methodology

Enrolment projections have been calculated for grades 1-12 by:

- a) Moving students ahead by a grade; and

- b) Adjusting the grade level enrolment in a school by the historical rate of change (average of the last five years) from one grade to another
 - a. Where the rate of change has been affected by an anomalous year(s), the rate of change has been adjusted to remove the effect.

Enrolment projections have been calculated for grade primary by:

- a) Calculating the average grade primary enrolment for the last five years
 - a. Where the average grade primary enrolment has been affected by an anomalous year(s), the projected enrolment has been adjusted to remove the effect.
