#### How does a student prepare for a tutoring session?

To have the best tutoring experience:

- find a quiet spot where you won't be disturbed
- close social media, chats, music, or video
- stop uploading or downloading large files as this can affect a connection
- be prepared with materials, and not ask a tutor to wait while you go find item
- let your tutor know if you need more help, and be active in your session.

There is no limit to the number of 20 minute tutoring sessions a student can have.
